

Programme note

It's a short story about the forest - how it once every year comes into the city.

That happens surely only in spring. All kind of civilisation products as bad smells, noise and dust are running in panic away from the strong power of spring. Unfortunately, it's not for long time, but that's enough to remind people about fresh air, wonderful, green trees and nice smells of flowers.

" One night in to the city came the Forest. From the beginning people did not understand, what is going on (...) over all streets of the city was breathlessly running the Stink of the gasoline and called after help. Someone wants her to choke, she has nothing to breath, from all sides of the city is coming the green Fog, it is smelling after Conifers and Flowers, the real Forest and all Stinks are getting bad from such a Fog, gasping for breath... "Help!"- was shouting the Stink and rushed away stinking. (...)"
